Mandated Policies and Programs Notification

Bay Head School is a Drug Free Workplace. All employees, students and guest of Bay Head School will abide by the conditions of the Drug Free Workplace Policy adopted by the Board of Education.

Right to Know Officer is Mr. Frank Alechko. Please contact his office to request Material Safety Data Sheets of chemicals used and or housed within the school environment.

As mandated by the Asbestos Hazard Emergency Response Act (AHERA) of 1986, a management plan was developed for Bay Head School, sent to the New Jersey Department of Health, and was approved on March 28, 1989. AHERA requires public schools to be inspected to identify any asbestos containing building materials. Every three years Bay Head School District employs an independent, outside licensed contractor to conduct a reinspection to determine whether the condition of any known or assumed asbestos containing building materials has changed and to make recommendations on managing or removing these materials. Between each three-year inspection, a trained representative of the board of education conducts a survey of the condition of these materials every six months to assure that they remain in good condition. Interested individuals may review the Management Plan by requesting an appointment during regular school hours with the Facilities Maintenance Manager.
